Experience

Front-end Tutor / Front-end development training with Python

MAY 2025 - PRESENT, ONLINE | CANADA

I am presently mentoring young, aspiring developers to bring their ideas to life using HTML, CSS, JavaScript with Python programming language on the side, and other modern frontend tools. Through hands-on projects, code reviews, and real-world insights, I help turn their curiosity into coding confidence.

Payrous / Blockchain-Powered Payroll Platform

DEC 2025 - APRIL 2025 | NIGERIA

I am currently contributing to the development of Payrous, an innovative blockchain-based platform designed to simplify bulk payment processes. The platform enables efficient management and automation of payments to multiple recipients, utilizing the security of smart contracts to ensure timely and cost-effective transactions.

Supported transactions in both native cryptocurrency and ERC20 tokens, enhancing the payroll experience for businesses and employees.

Betuptip.com / Football Prediction Platform

NOV 2024 - FEB 2025, LAGOS | NIGERIA

I worked exclusively on the development of the Livescore page for Betuptip.com, a globally recognized football prediction platform. The site offers expert betting advice through a team of seasoned analysts and tipsters, providing daily insights for both high-stakes wagers and safer betting options.

My role involved designing and implementing the Livescore page to provide users with real-time football match updates, integrating dynamic data, ensuring seamless user experience.

Custom Software & Document Management System / Contract Front-end Developer

NOV 2024 - MARCH 2025, UI | NIGERIA

Worked as a contract Front-End Developer on the Custom Software and Document Management (CSDM) system. CSDM is a robust document management platform designed to track and monitor the daily activities of employees, ensuring that tasks assigned to individuals, particularly lecturers and workers, are completed accurately and efficiently. My role involves contributing to the development of intuitive user interfaces to enhance functionality and improve the user experience.

Cogito / Front-end Developer Intern (Team Lead)

JULY 2024 - AUG 2024 | VERGOLD DIGITAL HUB, IBADAN

I led a squad of front-end developers during my internship to build a confidential in-house website for the company. The project involved utilizing Next.js, TypeScript, and Hostinger to develop a high-performing and scalable web application. I coordinated the team's efforts, ensuring efficient collaboration and smooth project execution while adhering to technical and business requirements.

Doorstep Groceries / Front-end Developer (Assistant Team Lead)

JUNE 2024 - JULY 2024 | DEVCON, IBADAN

I assisted in leading a tech team of product designers, front-end and back-end developers to design and develop an e-commerce website for an online grocery store. My role involved coordinating efforts across the team to ensure the website was successfully built and deployed. The project utilized React, JavaScript, and Vercel to create a seamless and scalable platform that meets business objectives and user needs.

Education

Osun State University / Physiology

DEC 2019 - SEPT 2023, OSOGBO

Second Class Degree Honors in B.sc Physiology
